

Video Tutorial Series on Ideation & Solution Development for Hackathon

SCERT Uttarakhand has developed a structured video tutorial series designed to guide both teachers and students through the complete process of ideation and solution development for hackathons. This series helps participants understand how to identify real-life problems, brainstorm meaningful ideas, and convert those ideas into practical, innovative solutions.

The videos cover key stages such as problem identification, idea generation, design thinking, creating prototypes, and presenting solutions effectively. With simple explanations, real examples, and step-by-step guidance, the series ensures that even first-time participants can confidently take part in hackathons. These tutorials aim to build creativity, critical thinking, and innovation skills among learners and teachers, enabling them to transform ideas into impactful projects.
